Re: Grand Canyon

It's long past the time for the FAA to start acting responsibly regarding the mandate of the 1987 Law To Restore Natural Quiet To The Grand Canyon. Your past refusal to act has allowed the greedy and arrogant air tour operators to rapidly increase their noise tours from 50,000 in '87 to more than 100,000 today.

How and why does the FAA refuse to follow the people's 1987 law? Is it incompetence? - arrogance? - or is the FAA simply in the tour operator's pocket? That's the question being asked by many taxpaying voters disgusted with the FAA's 'pro aircraft noise at any cost' record.

Time to start acting responsibly FAA!

Sincerely,

Joy Moeller
